

ATHARV SANTOSH SHETE

+91 7558645033 | atharvshete2005@gmail.com | LinkedIn | GitHub | LeetCode

Location: Pune, MH (Open to Bengaluru, Hyderabad)

EDUCATION

VIT Bhopal University

Bachelor of Technology in Computer Science and Engineering (AI & ML)

Bhopal, India

2023 – 2027

– **CGPA:** 7.91 / 10.0

– **Core Coursework:** Data Structures & Algorithms, Object-Oriented Programming (OOPs), Operating Systems, DBMS, Computer Networks, Machine Learning, Deep Learning, Artificial Neural Networks (ANN), Reinforcement Learning (RL), Natural Language Processing (NLP), Computer Vision.

TECHNICAL SKILLS

Languages: Python, Java, C++, SQL

Core CS & Systems: Data Structures & Algorithms, Object-Oriented Programming, Concurrency basics

AI/ML & Vision: Machine Learning, Deep Learning (DL), Neural Networks, NLP, Generative AI, Computer Vision (OpenCV, PIL)

Tools & Environments: Streamlit, Git, GitHub, VS Code, Jupyter Notebook, AWS Console

TECHNICAL PROJECTS

Logic Design & System Integration – “Daily” Project | *Python, GenAI, APIs*

- Engineered the core backend “Intelligence Layer” to manage temporal execution flows and system endpoints.
- Designed and integrated custom API frameworks to orchestrate operational tasks with Large Language Models.

AI-Powered Pothole Detection System | *Python, OpenCV, Machine Learning*

- Developed an end-to-end computer vision script to isolate and identify road anomalies from visual data.
- Applied grayscale preprocessing and threshold filtering to optimize real-time detection frame rates.

Interactive Edge Detection App | *Python, OpenCV, Streamlit, PIL*

- Built a functional web app displaying live comparisons between Canny, Sobel (X/Y/XY), and Laplacian edge algorithms.
- Engineered an interactive dashboard for clean user image uploads and instantaneous visual filter processing pipeline modifications.

StudySphere – Student Collaboration Platform | *Web Stack, SQL, GenAI*

- Architected a student environment featuring modular community engagement layers, file sharing, and AI-assisted interactions.
- Optimized relational database schemas to safely maximize horizontal query parsing and secure content tracking.

AI Fashion Advisor | *Python, Machine Learning, Recommender Systems*

- Engineered a personalized recommendation matrix utilizing algorithmic machine learning filters to suggest outfits from data profiles.
- Designed intelligent decision support mechanisms enhancing front-end matching outputs based on discrete user style sets.

CERTIFICATIONS

- **Cloud & Infrastructure:** Microsoft Azure Data Fundamentals (DP-900) | NPTEL Cloud Computing
- **AI & Machine Learning:** Applied Machine Learning in Python (University of Michigan) | IBM Generative AI
- **Emerging Tech:** NPTEL Internet of Things (IoT)

ACHIEVEMENTS & EXTRA-CURRICULAR ACTIVITIES

- **Problem Solving:** Actively solving Data Structures and Algorithms problems on platforms like LeetCode and HackerRank.
- **Cloud Sandboxing:** Practiced launching virtual network configurations, IAM roles, and cloud instances using AWS simulations.
- **Music:** Passionate **Acoustic Guitarist**; engage in self-practice and learning music theory to foster focus and discipline.
